Citations with PDF tooltips

Mikica Kocic

This paper describes package `xcpdftips`
version 1.1 from 2019/03/18

1 Introduction

This package allows one to be able to do `natbib` citations with PDF tooltips.

2 Invoking the Package

The macros in this package are included in the main document with the `\usepackage` command of LaTeX 2_ε,

```
\documentclass[..]{...}
\usepackage[⟨options⟩]{xcpdftips}
```

where [⟨*options*⟩] is one of: `redefcite`, `ocg`, or `tcolorbox`.

The option `redefcite` replaces `natbib`'s `\cite` with `\xpdfcite`.

The option `ocg` puts tooltips on PDF layers using OCG.

If `ocg` is used and `tcolorbox` is enabled, the package will use `\tcolorbox` instead of `\fcolorbox`.

3 Usage

This package must be used with BibTeX and `natbib`, not with a hand-written `thebibliography` environment. More precisely, there must be a `.bbl` file external to the LaTeX file; whether this is written by hand or by BibTeX is unimportant.

`\xpdfcite` A replacement for `natbib`'s `\cite` macro.

Similarly to `\cite`, the command `\xpdfcite` may take one or two optional arguments to add some text before and after the citation,

```
\xpdfcite{⟨key(s)⟩}
\xpdfcite[⟨post⟩]{⟨key(s)⟩}
\xpdfcite[⟨pre⟩][⟨post⟩]{⟨key(s)⟩}
```

4   Caveats

The `xcpdftips` package will work with `natbib` with its native `\bibitem` format, and with standard LaTeX. It will also work with `url` package.

The OCG support requires `ocgbase` and `pdfbase` versions $\geq$ 2018/04/06

Nothing else can be guaranteed.

5   Options with `docstrip`

The source `.dtx` file is meant to be processed with `docstrip`, for which a number of options are available:

`package` to produce a `.sty` package file with most comments removed;

`driver` to produce a driver `.drv` file that will print out the documentation under LaTeX 2_ε. The documentation cannot be printed under LaTeX 2.09.

The source file `xcpdftips.dtx` is itself a driver file and can be processed directly by LaTeX 2_ε.

6   The Coding

This section presents and explains the actual coding of the macros. It is nested between `%<*package>` and `%</package>`, which are indicators to `docstrip` that this coding belongs to the package file.

Package options   redefcite, ocg, tcolorbox

```
1 \newif\ifXCP@redefcite\XCP@redefcitefalse
2 \newif\ifXCP@useocg\XCP@useocgfalse
3 \newif\ifXCP@usetcolorbox\XCP@usetcolorboxfalse
4
5 \DeclareOption{redefcite}{\XCP@redefcitetrue}
6 \DeclareOption{ocg}{\XCP@useocgtrue}
7 \DeclareOption{tcolorbox}{\XCP@usetcolorboxtrue}
8
9 \ProcessOptions\relax
```

`\XCP@tooltipbox`   Command for creating a tooltip box on the OCG layer. The arguments are the same as for `\fcolorbox`.

```
10 \ifXCP@useocg
11 \ifXCP@usetcolorbox
12 \ifx\tcolorbox\undefined
13   \RequirePackage{tcolorbox}
14 \fi
15 \newcommand{\XCP@tooltipbox}[3]{%
16   \begin{tcolorbox}[colframe=#1, colback=#2,%
17       width=1.02\columnwidth, arc=2pt,%
18       boxsep=2pt, top=0ex, bottom=0ex, left=0.1em, right=0.1em%
19     ]\normalfont\small #3\end{tcolorbox}%
20   }
21 \else
```

```
22  \newcommand{\XCP@tooltipbox}[3]{%
23    \fcolorbox{#1}{#2}%
24      {\parbox[t]{\columnwidth}{\normalfont\small #3}}%
25  }
26  \fi
27 \fi
```

\XCP@ocgtooltip Usage: \XCP@ocgtooltip{⟨*link text*⟩}[⟨*tooltip box color*⟩]{⟨*tooltip text*⟩}
Warning: Requires pdfbase and ocgbase >= 2018/04/06
